Project of the Year – Fast Forward

New for 2026, this category recognises bold, future-centric concept work. This category is not for completed projects, but instead for the radical, visionary ideas that will shape tomorrow's commercial interior design and architecture. Submit sketches or renders of your imagined spaces or buildings, along with thoughtful explanation of how the concept reflects meaningful innovation.

To be in with a chance of winning, we encourage all entrants to be as detailed as possible in their entries, paying special attention to these four criteria: **Sustainability, Innovation, Functionality and Design**. The final score of a submission is determined by the average score given by our independent panel of judges across these four criteria. Extra merit may be awarded to stand out entries.
